Proofpoint Threat Response v3.3.1
Release Notes

September 2017

Release Summary:

Threat Response 3.3.1 is a maintenance release that provides internal process streamlining to increase the platforms performance and efficiency.

1. [Platform Performance](#)
2. [Download Instructions](#)

Recommendations:

As with any software upgrade it is recommended that a full system backup be created in the Appliance Management Console. This backup, as well as an export of the Master Secret, should be downloaded and stored in a secure location.

If any issues are encountered during or after upgrading please open a support ticket at: https://support.proofpoint.com/

Platform Performance Enhancements

Platform improvements have been made in the following areas:

- **Email Quarantine Process:** The method for iterating through a target mailbox was streamlined to enable faster searching and reporting.

- **Exchange Result Reporting:** The status message from EWS being displayed was refined to better reflect the result.

- **Logging:** Instrumentation was added to the platform to increase information collection for support and troubleshooting.

Download instructions

NOTE: Starting in Threat Response v3.2.0, the minimum specification of the virtual appliance has been updated. Please review the Virtual Machine requirements section for updated minimum specification.
